### [1. NIH/NCI 350: Highly Innovative Tools for Quantifying Redox Effector Dynamics in Cancer](#)

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

The generation and dynamic interplay of redox effector molecules (e.g., oxygen, free radicals, peroxides, nitrogen oxides, and hydrogen sulfide) are fundamental features underlying the genomic, structural, metabolic and functional alterations observed in cancers.

SBIR Department of Health and Human Services

### [2. NIH/NCI 351: Modulating the Microbiome to Improve Efficacy of Cancer Therapeutics](#)

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Metagenomic studies in humans and animal models have established that there are alterations of the GI microbiota community during development of neoplastic and pre-neoplastic disease, and in tumor-bearing vs. healthy individuals.

SBIR Department of Health and Human Services

### [3. NIH/NCI 352: Cell and Animal-Based Models to Advance Cancer Health Disparity Research](#)

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Cancer health disparities (CHDs) are defined as differences in the incidence, prevalence, morbidity, and mortality that contribute to an unequal burden of cancer and represent a major public health concern both nationally and globally.

SBIR Department of Health and Human Services

#### **[4. NIH/NCI 353: Cell-Free Nucleic Acid-Based Assay Development for Cancer Diagnosis](#)**

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

The evidence that cell-free circulating DNA is present in cancer patient's blood was first reported over half century ago.

SBIR Department of Health and Human Services

#### **[5. NIH/NCI 354: Companion Diagnostics for Cancer Immunotherapies](#)**

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

The field of cancer immunotherapy has expanded rapidly over the last few years with the development of several new immunomodulatory agents that have shown promising clinical results.

SBIR Department of Health and Human Services

#### **[6. NIH/NCATS 013: Development of Stem Cell-based Assay for High-Throughput Screening of Chemicals of Toxicological Concern](#)**

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Adverse human health outcomes – a.k.a., “toxicity” – caused by pharmaceutical or environmental compounds are a major cause of drug development failure and public health concern.

SBIR Department of Health and Human Services

#### **[7. NIH/NCATS 014: Development of Smart Plate Technology](#)**

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Microtitre plates are nearly ubiquitous in many life sciences laboratory settings, used as a standard tool to act as the vessel in which a wide variety of experiment types are performed.

SBIR Department of Health and Human Services

## [8. NIH/NHLBI 094: Transcatheter Cavopulmonary Bypass Endograft](#)

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Extra-anatomic bypass or vascular shunts divert blood flow. In congenital heart disease, these surgical procedures are critical for management.

SBIR Department of Health and Human Services

## [9. NIH/NHLBI 095: Active MRI Transseptal Needle](#)

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Catheter access to the left atrium is a fundamental step to numerous transcatheter therapies including catheter ablation of rhythm disorders, diagnostic catheterization in pediatric and structural heart disease, and future treatments for mitral valve and left atrial appendage disease.

SBIR Department of Health and Human Services

## [10. NIH/NHLBI 096: Bioabsorbable Stents for Neonatal Aortic Coarctation](#)

Release Date: 07-24-2015 Open Date: 07-24-2015 Due Date: 10-16-2015 Close Date: 10-16-2015

Aortic coarctation is a common congenital heart condition that is usually recognized during the neonatal period early after birth.
